

# Fleece Edge

## CVR

Edgemate uses state of the art equipment and technology combined with dynamic raw veneer resource management to produce a range of veneer products unmatched in the industry. The use of coiled veneer products has become an integral component of real wood edge treatments within the industry. The manufacturing advantages and the economies derived from the use of coiled veneer products offer substantial benefits, including simplified inventory control, minimized waste, and the maximum utilization of valuable natural resources.

### FLEECE EDGE AUTOMATIC CVR

The original backed automatic coiled veneer edging featuring a specially saturated fleece membrane which has been laminated in a continuous process to carefully selected standard or premium grade veneers. The expertly matched finger joints and fine sanding provide a cost effective and beautiful real wood edge treatment. Edgemate offers specialized processing for softform applications, featuring precision sanding and flexing, and options such as fixed length increments in coils with magnetic sensing tape. A special Type 1 moisture resistant fleece lamination with polyurethane (PUR) adhesive or a catalyzed PVA adhesive is also available by custom order.

### FLEECE EDGE PREGLUED CVR

Our economical grade of preglued veneer edgebanding is manufactured with selected, finger jointed, fleece backed and sanded veneers. This product is suitable for straight line and simple contour/radius applications. Edgemate preglued veneer edgebanding is available with either pre applied hot melt or pressure sensitive adhesives in a wide range of sizes and species. An excellent stock program with same day service is offered.

### PREFINISHED FLEECE EDGE CVR

UV cured, highly durable, clear lacquer finished edging. Prefinishing eliminates finishing time and reduces environmental concerns. The UV finish brings out the natural beauty of the real wood and provides added durability. Available on any wood veneer specie, Edgemate also offers a wide range of veneer species to match today's popular prefinished wood panel products. Custom tinting to match and a range of gloss levels is also available.

### THICK VENEER EDGE CVR AUTOMATIC

Edgemate offers a wide range of high quality thick veneer edging in continuous rolls. Available thickness range from 1.0mm to 3.0mm. Thick veneer coils provide many features, including 100% utilization, increased machine throughput and efficiency, high impact resistancy, and simplified inventory control. Edgemate's thick veneer coils are laminated with a special polyurethane (PUR) adhesive to provide increased flexibility, reduced coil memory without formaldehyde emissions. Edgemate stocks an excellent selection of thick veneer edgings including all popular thicknesses, sizes, and species.

Prefinished thick veneer edgings are also available on a custom order basis.
